

Rushik Kokate

+91 9158883636 | kokaterushik@gmail.com | linkedin.com/in/rushikkokate175 | Thergaon, Pune

Objective

Enthusiastic Computer Science student with hands-on experience in full-stack web development across the MERN and Flask/React stacks, and applied Data Science/Machine Learning internship experience spanning forecasting, NLP, and agentic AI. Actively seeking opportunities to apply real-world problem solving and scalable application development skills.

Education

G.S. Moze College of Engineering

Bachelor of Engineering in Computer Science

Balewadi, Pune

Expected 2027

Work Experience

Data Scientist Intern

Amdox Technologies

Jan 2026 – Feb 2026

Remote

- Built a data pipeline to gather, filter, and clean data for cryptocurrency forecasting in the Quantara project.
- Created tools to feed clean data directly into LSTM and ARIMA forecasting models.
- Fine-tuned a market sentiment analysis model, improving its accuracy from 82% to 94%.

Data Scientist Intern

ITVedant Education Pvt Ltd

Feb 2026 – Apr 2026

Remote

- Built a Phishing Link Detector from scratch to spot dangerous links using past data.
- Trained a machine learning model for the detector that achieved 92.8% prediction accuracy.

Agentic AI Intern

Innomatics Research Labs

Feb 2026 – May 2026

Remote

- Managed multiple AI projects, including fine-tuning a BERT model to handle simple text replies.
- Developed an interactive AI chatbot to help users build PCs and troubleshoot hardware problems.

Gemini Student Ambassador

Google Inc.

May 2026 – Present

Remote

- Hosted online AI events for 20+ participants, focusing on image and music generation using Gemini tools.
- Created tutorial videos and hosted live sessions on LinkedIn and Instagram to showcase Gemini's capabilities.

Personal Projects

Nikas Exim Global | *Freelance Website Development*

May 2026 – Present

- Built, deployed, and launched a live business website within 5 days, handling all domain setup and hosting.
- Fixed bugs, updated features based on client feedback, and built a backup system to handle unexpected crashes.
- Kept the platform running with zero downtime for over a month while continuing to monitor for risks.

Domain-Aware Library Search Engine | *College RAG Project*

Mar 2026 – Apr 2026

- Built an AI search engine for the college library using engineering syllabus PDFs and book databases.
- Designed the system to look up books by concepts and specific questions, acting like a digital librarian that knows the actual text inside the books.
- Added a recommendation system to suggest the exact books a student needs based on their query.

Skills

Full Stack Web Development: React, Bootstrap, Node.js/Express, Flask

Database Management: SQL, NoSQL (MongoDB)

Data Science / Machine Learning: Python, Numpy, Pandas, Matplotlib, Seaborn, LSTM, ARIMA, BERT fine-tuning

Version Control: Git

Other: Data Cleaning & Wrangling, RAG Systems, Agentic AI Workflows

Extra-Curricular Activities

Engaging with web development and AI communities.

Actively learning new frameworks, libraries, and languages (e.g., TensorFlow, Streamlit, FastAPI).

Following web development and AI blogs, and taking online courses to stay updated with industry trends.
